

How RAM Mounts Help Increase Productivity in the Transportation Industry

CASE STUDY SUMMARY

CASE STUDY SUMMARY: PAPER TRANSPORT

Paper Transport is a transportation company that employs more than 700 drivers, and operates through 11 states in the USA.

THE PROBLEM

With the ELD (Electric Logging Device) mandate fast approaching, Paper Transport needed a solution to protect, dock, and charge the Samsung Galaxy Tab S tablets in their fleet.

Cheap mounting products of the past were not providing the durability and ease-of-use Paper Transport was looking for.

THE SOLUTION

Paper Transport chose RAM Mounts and IntelliSkin with GDS Technology for their fleet. This solution allowed the drivers with Paper Transport charge devices and keep them securely docked. The Interchangeable end caps allow upgrading to new devices simple and cost effective

RAM Mounts IntelliSkin with GDS Technology was Simple, Reliable, and Future-Proof. Paper Transport deployed 2,200 units!
